

# ThinkAgile HX Series

Hyperconverged (HCI) solutions to enable faster any hybrid multi-cloud any to run any workload at any scale, anywhere

## Increase Your Freedom by modernizing your infrastructure

Operating a data center increasingly involves complex tasks, such as managing multiple silos of servers, storage, networks, and mission-critical applications. Consequently, IT departments often spend most of their budget maintaining this infrastructure, instead of investing in new projects. With ThinkAgile HX, customers can run distributed applications using Kubernetes and containers. Lenovo's advanced GPU enabled solutions allow you to leverage AI/ML applications using AI and data analytics to build intelligence into business operations allowing our customers to deliver smart services and monetize their data quickly and easily.

Lenovo ThinkAgile HX Series, a best-in-class hyperconverged system with Nutanix's industry-leading software preloaded on Lenovo platforms, dramatically simplifies data center management, frees up your IT staff, and accelerates your deployment up to 85% faster-ultimately reducing your total ownership cost.

## Simplify Your IT

Since 2014, Lenovo and Nutanix have collaborated to help businesses simplify IT and shrink OPEX. ThinkAgile HX Series consolidates compute, storage, and virtualization software into a resource pool, easily managed in scale-out clusters through a single interface. The series ships from Lenovo as fully integrated and validated building blocks, and delivers extreme reliability, security, scalability, and simplified management. As a result, you can deploy applications faster, without the hassle, while gain up to 477% ROI over 5 years. ThinkAgile HX is also available in as-a-service offering with monthly payments based on usage.

Use Nutanix Prism for one-click planning, provisioning, insights, and firmware updates to achieve faster, simpler IT operations. Leverage the time and cost-savings of ThinkAgile HX to enable your IT to focus on innovative solutions for your business enabling new levels of performance, higher workload consolidation and security for core, cloud and at the edge.

For 9 years running, Lenovo servers have ranked as the industry's most reliable x86 platforms, enabling you to run your workloads predictably, with 85% less planned downtime for finance, healthcare, manufacturing and education. Enhanced with faster processors and memory, Lenovo platforms hold more than 294 current performance world records, so you can run your workloads with blazing-fast speed\*. Lenovo XClarity, a fast and intuitive resource management tool, captures Lenovo proactive platforms, enabling administrators to replace a failing component while avoiding unplanned downtime.

Lenovo has engineered, tailored, and validated ThinkAgile HX designs for a wide range of business solutions, so that you have the freedom to run any workload, at any scale, anywhere.

New refreshed HX series featuring the latest technological advancements in processing with 4th generation processors from Intel and AMD are now available with more cores and increased memory capacity.

## Enjoy a Transformative Experience

Lenovo ThinkAgile Advantage provides end-to-end life cycle management for a seamless, simple customer experience for planning, deployment, and maintenance, including a 24/7 Single Point of Support. ThinkAgile HX Series also includes the option of shipping from Lenovo's factory in a rack, along with any combination of ThinkSystem servers, storage, and networking, which facilitates quick deployment of solutions based on validated HX reference architectures.

Now enhanced with even faster processors and memory, Lenovo platforms hold the highest number of performance world records so you can run your workloads at blazing-fast speed for accelerated outcomes. ThinkAgile HX Series models are optimized for a broad set of virtualized workloads for on premises or in the cloud, including ROBO, VDI, office applications, analytics, and in-memory databases like SAP HANA and SQL. Deploy your HCI clusters rapidly and confidently with Lenovo.
